The drum mower is able to operate even under hard conditions!

TRAILER

1270 x 950 x 300mm
1370 x 1040 x 300mm

ROAD SWEEPER OR LAWN AERATOR

Sweeping efficiency is to be regulated by switching the brush drive and adjustment of pressure. This brush is also suitable for thicker materials, sand etc., and for snow removal in winter as well.

SPREADING UNIT or FERTILISER APPLICATOR

The rotary brush and snow cutter operate at the front; the tie-on spreader for pavements operates at the back. Ideal solution for residential areas, smaller towns and villages. Alternatively, the spreader can serve as a fertiliser applicator for lawn and park treatment.
